

BPW - THE QUALITY FACTOR

BPW Training Seminars

One of the key requisites for ensuring the safe operation of BPW axles and suspensions is maintenance carried out professionally. This is why we have been offering our BPW training seminars for a number of years now. This successful concept has become a real hit, as many vehicle manufacturers, fleet operators, repair stations, parts centres and dealers take advantage of the seminars we offer. Although this really comes as no surprise they can all learn everything they need to know about BPW technology.

We can also tailor the courses to your particular requirements if you prefer. All training normally takes place at BPW Axles in Johannesburg, and once a year in the main centres such as Durban, Cape Town, Port Elizabeth, East London, Nelspruit and Polokwane.

BPW Training Courses Information - 2010

Heavy axle program

Axle and suspension maintenance – 2 day course

This course covers the evolution of axle and suspension systems over the last ten years, and deals with maintenance and servicing issues. The course carries an examination on the second day in the afternoon. The focus areas are hub systems, drum brake, disc brake, air suspensions, mechanical suspensions and turntables. A certificate is issued to all participants who have successfully passed the exam.

Course fee – R 600.00 per person including VAT.

Axle and suspension maintenance – 1 day course

This course teaches the basics of axle and suspension maintenance over 1 day. This course is matched to the customer's needs. The main areas of focus are Hub systems, drum brake/ disc brake, air suspensions/ mechanical suspensions.

Training can be carried out at the customer's premises.

Course fee – R 600.00 per person including 14% VAT

Spare Part Identification – 1 day course

The aim of this course is to ensure that all participants from parts centres and dealers can quickly and efficiently identify BPW original parts.

Course fee – R 400.00 per person including VAT.
