

# Genuine quality makes a difference.

Only the original is genuinely the best.

Genuine BPW quality should always be the first choice – especially when safety is at stake.

The ECO-Li Plus grease has been developed and tested by BPW for many years and is still continuously tested and improved to ensure optimum lubrication, protection and compatibility with the components of the hub unit. The production method of the grease has to this day not been changed, only improved, to ensure a high-quality grease and to offer the lowest cost of ownership.

## Genuine BPW products – genuine BPW quality.

BPW lubricants represent an investment in vehicle reliability. It therefore makes good sense to insist on genuine BPW quality.

Some anti-friction bearing greases appear similar to, or even deliberately imitate, the BPW genuine product. By using alternatives, however, you can impair the reliability and operation of the lubricated bearings and brakes. On no account is the lithium-based BPW ECO-Li Plus grease to be mixed with other greases, such as those based on sodium. Mixing reduces lubricity and, in some circumstances, can cause the bearings to overheat or even fail. For this reason, always insist on the genuine product. Ask your BPW authorised dealer about BPW ECO-Li Plus anti-friction bearing grease.

## The BPW ECO-Li Plus range of long-life anti-friction bearing grease.

- Lithium complex grease for reduced bearing wear and prolonged service life.
- Highly suitable for high-pressure centralised lubrication systems
- Consistency grade 2-3
- Temperature range from -30 c to 160 c

Also take a look at our other perfectly matched **BPW genuine spare parts:**

### BPW GREASE APPLICATORS

**Saves you hours.**

- Precise grease quantities – No waste
- Long Service life of tapered roller bearings thanks to clean grease fill.
- Compact, enclosed design- easy handling

### TAPERED ROLLER BEARINGS

**Proven dependability.**

- Optimized tolerances for reduced rolling friction
- Easy lubrication of bearing with grease cartridge (Eco+3)
- Perfect pairing of bearings and grease.

### BPW ECO PLUS SEALS

**Seals in every situation.**

- Two part rotating seal, rotates within hub
- Two – Three fold sealing system
- Perfect pairing of seals and grease
